PRODUCT DATA SHEET EAZY MUDSOLV-C

Product Code: 1121
Packaging: 25L

Product Group: Water Treatment
Issue/Date: 1.40 - 29/11/2007

PRODUCT DESCRIPTION

eazy Mudsolv-C is a concentrated and completely safe ballast water treatment specially formulated to condition, remove and prevent the build up of silt and mud deposits.

APPLICATION & USE

Product can be effectively used in ballast tanks, cooling water systems and pipe lines and is also an efficient antiscalant. Benefits of using product can include reducing the environmental risk of transporting invasive marine species locked into mud deposits, maintaining optimum cargo carrying capacity and stability, reducing the potential for corrosion and for survey or inspection purposes avoiding the costly exercise of 'mucking out' and disposal.

DIRECTIONS FOR USE

In order to obtain optimum results product should be dosed into the filling line of the ballast or cooling system at predetermined rates prior to the systems being filled in order to ensure product is thoroughly dispersed. The loose deposits of silt and mud are easily discharged during deballasting.

The normal dosage rate for maintenance purpose is 1 litre per 20 tonnes of ballast water and the treatment should be repeated each time the ballast tank or cooling system is filled.

In the case of existing accumulations, a dosage rate of 1 litre per 10 tonnes of ballast water is recommended and should remain in the tank for at least 24 hours. It should be noted that depending on the degree of mud accumulation it may take several treatments before any significant reduction is achieved.

For severe mud build up results will be obtained in a shorter period if aided by direct agitation/mechanical action prior to ballasting. This will allow product to penetrate more easily following the next ballasting operation.

HEALTH & SAFETY

Please refer to the Material Safety Data Sheet and Product Label for specific information.

LIMITATION OF LIABILITY

IMPORTANT: Eazychem's standard terms and conditions of sale apply and contain limitations on any liability that may be incurred by Eazychem arising in any way from the sale and use of any Eazychem products. In particular please note that Eazychem's terms and conditions state the following:

Except in respect of death or personal injury caused by Eazychem's negligence, or liability for defective products under the Consumer Protection Act 1987, Eazychem shall not be liable to the Buyer by reason of any representation (unless fraudulent), or any implied warranty, condition or other term, or any duty at common law, or under the express terms of the Contract, for loss of profit or for any indirect, special or consequential loss or damage, costs, expenses or other claims for compensation whatsoever (whether caused by the negligence of Eazychem, its employees or agents or otherwise) which arise out of or in connection with the supply of the Products (including any delay in supplying or any failure to supply the Products in accordance with the Contract or at all) or their use or resale by the Buyer, and the entire liability of Eazychem under or in connection with the Contract shall not exceed the price of the Products, except as expressly provided in these Terms.
