#### **PRODUCT DESCRIPTION**

eazy OSE is a low toxic biodegradable and environmentally acceptable oil spill dispersant with high dispersing efficiency. It is specifically designed for oil pollution on water and is a concentrated blend of solvents and dispersants offering a cost effective means of dispersing oil.

Product will convert hydrocarbons into fine emulsions.

#### **APPLICATION & USE**

Product can be used on a wide range of oils, converting the oil slick into small droplets which are rapidly distributed within the sea as part of natural water movement.

#### **DIRECTIONS FOR USE**

Product should be used neat and applied directly on the affected area by spraying.

#### **Spills on Water**

After containing the contaminated area, product should be sprayed uniformly over the surface of the floating oil (10 to 25% by volume) using a pressurized spray system. Allow product to soak for 15 to 20 minutes and then use water jets over the treated area to vigorously agitate and aid the dispersion of oil.

#### **Spills on Solid Surfaces**

After removing as much oil as possible, spray product neat over the affected area and allow adequate time for absorption. The mixture can then be dispersed by means of a fire hose.

#### **HEALTH & SAFETY**

Please refer to the Material Safety Data Sheet and Product Label for specific information.
