PRODUCT DESCRIPTION

eazy OWS Cleaner quick breaking degreaser is an emulsifying detergent for general engine room degreasing and for use in conjunction with oily water separators.

It is a blend of surfactants and solvents with exceptional cleaning properties that breaks quickly allowing oil to separate from water.

It will not harm the operation of oily water separators, reducing the potential for oil discharge which is a requirement under the MARPOL regulations.

APPLICATION & USE

Product is easy to apply and can be used to clean machinery, floor plates, and bulkheads as well as engine room bilges.

DIRECTIONS FOR USE

Product can be diluted with fresh or seawater. For general cleaning, dilute product in a 5 to 10% solution of water depending upon the degree of cleaning required.

After allowing the solution to penetrate the soiled areas, rinse well with warm water.

The general recommendation by most separator manufactures is for degreasers to be diluted to a 0.1% solution prior to being passed through a separator. Advice on specific requirements should be sought from the separator manufacturer.
