---

eazy Degreaser is a blend of emulsifying solvents and surfactants that can be used as an effective cleaner for soiled surfaces, bilges, bulkheads, painted surfaces and machinery parts.

Product has been tested by Marinfloc and approval status is granted as "Can Be Separated". Contact [technical@eazychem.co.uk](mailto:technical@eazychem.co.uk) or contact Marinfloc directly for specific details.

### Application and use

Product is applied neat by hand, brush or spray. The cleaning time should be 30 to 90 minutes before washing off with hot or cold fresh water or seawater.

Product is also suitable for use in steam cleaning equipment.

### Directions for use

#### Circulation Method:

This method can be used to clean lube oil heat exchangers, oil pre-heaters and filters.

#### Spot Cleaning:

Product should be sprayed neat onto dirty surfaces. Bulkheads can be washed down using high pressure cleaning machines preferably using hot water at 60°C.

#### Soak Method:

Dirty parts can be cleaned in a bath of neat product for at least 30 minutes and then rinsed with plenty of fresh water.

#### Spray Method:

Product should be sprayed neat onto dirty surfaces. The cleaning time should be 15 to 30 minutes and then rinsed with plenty of fresh water after scrubbing if necessary.

### Health and Safety

Please refer to the Material Safety Data Sheet and Product Label for specific information.

### Limitation of Liability

Eazychem's standard **terms and conditions** of sale, available on request, apply and contain limitations on any liability that may be incurred by Eazychem arising in any way from the sale and use of products supplied by Eazychem.
