

**EAZY OSE**

---

<b>Product Code:</b>	2431	<b>Packaging:</b>	25L
<b>Product Group:</b>	Cleaning: Solvent Based	<b>Issue/Date:</b>	1.40 - 31/07/2015

---

**eazy OSE is a low toxic biodegradable and environmentally acceptable oil spill dispersant with high dispersing efficiency.**

It is specifically designed for oil pollution on water and is a concentrated blend of solvents and dispersants offering a cost effective means of dispersing oil.

Product will convert hydrocarbons into fine emulsions.

**Application and use**

Product can be used on a wide range of oils, converting the oil slick into small droplets which are rapidly distributed within the sea as part of natural water movement.

**Directions for use**

Product should be used neat and applied directly on the affected area by spraying.

**Spills on Water**

After containing the contaminated area, product should be sprayed uniformly over the surface of the floating oil (10 to 25% by volume) using a pressurized spray system. Allow product to soak for 15 to 20 minutes and then use water jets over the treated area to vigorously agitate and aid the dispersion of oil.

**Spills on Solid Surfaces**

After removing as much oil as possible, spray product neat over the affected area and allow adequate time for absorption. The mixture can then be dispersed by means of a fire hose.

**Health and Safety**

Please refer to the Material Safety Data Sheet and Product Label for specific information.

**Limitation of Liability**

Eazychem's standard **terms and conditions** of sale, available on request, apply and contain limitations on any liability that may be incurred by Eazychem arising in any way from the sale and use of products supplied by Eazychem.
