

EAZY NBD

Product Code:	2475	Packaging:	25L & 200L
Product Group:	Tank Cleaning	Issue/Date:	1.60 - 31/07/2015

eazy NBD is an effective non-caustic detergent designed for use in circumstances where caustic based cleaners cannot be used.

It is safe to use on most metals including zinc, tin, aluminium and galvanised materials and zinc silicate coated tanks.

In accordance with MARPOL Annex II Regulation 13.5.2 and MEPC.1/Circ.590, Tank Cleaning Additives Guidance Note and Reporting Form, eazy NBD is approved as a cargo tank cleaning additive.

Application and use

Product is suitable cleaning cargo tanks after discharge of drying, semi-drying and non-drying natural oils and fats.

It can be used for tank cleaning and deodorising prior to changing to foodstuffs in order to achieve a sufficient standard of cleanliness.

Directions for use

General Cleaning

Product should be applied undiluted for general maintenance applications such as deck areas and bulkheads. Once applied, it should be allowed to soak for at least 15 to 20 minutes and agitated by brushing, then rinsed thoroughly with water.

Tank Cleaning

For tank cleaning applications a pre-wash with hot water at a temperature of 60 to 70°C is recommended. A solution rate of 2 to 5% should then be premixed in a holding tank and re-circulated by automatic tank washing equipment for a period of 3 to 6 hours at 80°C. Product can also be used to degrease tanks by spray method. It should be applied undiluted and allowed to soak for a period of at least 30 minutes and then rinsed with hot water at 60 to 70°C.

NOTE: Certain types of oils require lower cleaning temperatures due to polymerisation issues. Consult with the cargo supplier for more information and guidance.

SUPERVISION

As well as a full range of globally available tank cleaning chemicals, we are also able to offer services in upgrading vessels from “dirty” to “clean” cargoes. By attending a vessel during the discharge of its oil, and then remaining with it through the subsequent cleaning operation, we ensure that it is in a suitable condition to load the next cargo.

Our supervisors have been market leaders since 1981 in assisting clients to protect their financial interests during clean up. Available at short notice to travel globally, a pool of personnel based in the UK and USA include former Master Mariners with proven track records in tank cleaning.

By combining product and service our total package is not only competitive but offers excellent value in providing a worry-free solution for the operator.
